

# FLOOR STICKER INSTALLATION

## STEP 1

Clean surface thoroughly using an alcohol based cleaner to remove any grime/oil and dust from the surface before installing the floor sticker.

## STEP 2

Place sticker in desired area and tape the floor sticker in place (making sure it is centered in the desired location).

## STEP 3

Peel away half the graphic from the backing paper and cut off the loose backing paper using a Stanley blade or scissors.

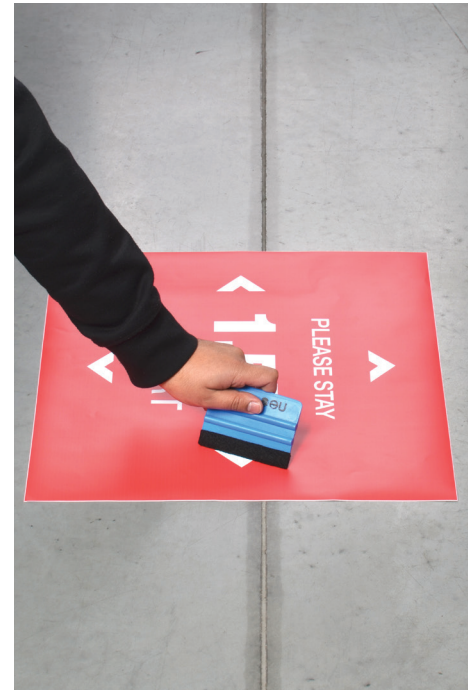

## STEP 4

Firmly press the graphic to the floor. Use back and forth motion with a vinyl squeegee or a credit card wrapped in a rag to help with this ensuring all air bubbles are pushed out toward the edges.

## STEP 5

Remove the rest of backing paper.

## STEP 6

Continue to press down removing any excess air bubbles from the rest of the floor sticker.

### PLEASE NOTE:

Although this product has been designed to be easily installed, we recommend that they are installed professionally to ensure the floor stickers are correctly applied to the surface and to also prevent them from being a possible trip hazard.
